

AWARD® Dataroom

The AWARD[®] Dataroom module provides complex projects with a controlled and stream-lined mechanism for gathering and publishing information, both internally and to Suppliers or Bidders. It provides users with the tools for consistent, efficient and auditable communication. Secure storage and resilient sharing of data ensures that the integrity of data is at the heart of your strategic sourcing projects.

The AWARD[®] Dataroom module has been developed to specifically meet the needs of strategic procurement projects, delivering best practice ensuring that users' needs are met at every stage of a strategic project. The AWARD[®] Dataroom delivers:

- · Secure, resilient cloud data environment
- Document and workflow management
- Robust user access and management
- Clear, efficient, auditable communication
- · Intuitive user interface
- · Full reporting capabilities
